

WHAT IS COMPOSTABLE PACKAGING?

Compostable packaging is a replacement to single use plastics. It reduces landfill waste, enriches soil, conserves resources, and cuts greenhouse gas emissions.

HOW ARE COMPOSTABLE BAGS MADE?

Compostable bags are made of bio-plastic raw materials certified by TUV OK Compost. These bioplastics are made from food waste starch and become nutrient rich soil at the end of life.

WHAT IS YOUR TURNAROUND TIME?

We deliver within 15-25 days to ensure top quality. Custom orders may have different timelines to meet our high standards.

COMMON COMPOSTABLE CONCERNS

ARE YOUR PRODUCTS CERTIFIED?

Our products are Certified by Central Pollution Control Board, in alignment with ISO 17088, International BPI and TUV Austria's OK Compost for raw materials.

WHAT IS THE SHELF LIFE?

Our products have a shelf life of 6-8 months and should be disposed off with your wet waste, so it can be treated by your local municipal compost unit.

IS CUSTOMISATION POSSIBLE?

We service custom sizes and prints with 2-3 color printing jobs, along with one time Printing block charges on actuals and deliver Pan India as well as Internationally.
